ASSESSMENT PURPOSE AND ORGANIZATIONAL COMMITMENT

Since the completion of the 2019 Community Health Needs Assessment and while entrenched in the COVID-19 pandemic, Richland County community coalitions, businesses, and organizations have continued forward motion with initiatives to positively impact the following important health care needs.

This Community Health Needs Assessment (CHNA) identifies and prioritizes the health and wellness needs of individuals in the communities served by The Richland Hospital and Clinics (TRHC). The priorities identified in this report will help guide the organization's Community Health Improvement Plan (CHIP) and community benefit activities, as well as its collaborative efforts with other agencies and organizations that share the mission to improve community health.

All non-profit hospitals are required to conduct a CHNA every three years. This assessment meets the requirements of the Patient Protection and

Affordable Care Act (ACA), IRS Code 501(r) (3). TRHC has a long tradition of working with partners and key community stakeholders outside the hospital to meet the health needs of the community. In 2013, 2016, and 2019 TRHC collaborated with community stakeholders to complete the CHNA. In 2016 and 2019, TRHC invited multiple key stakeholders to become part of the Health Assessment and Wellness Commission (HAWC). Partnering with Richland County Health and Human Services, UW-Madison Division of Extension Richland County, and the Richland School District, HAWC jointly completed the 2016 Richland County Area Community Health Needs Assessments. In those CHNAs, the following three priorities were identified: Mental Health Treatment, Substance Abuse Treatment and Prevention, and Obesity Treatment and Prevention. Since 2016, community coalitions, businesses, organizations and key stakeholders have continued to address these CHNA priorities.

MENTAL HEALTH NEEDS IN THE COMMUNITY

Stronger Together (2019-2020) UW-Madison Division of Extension Richland County presented a series of workshops for farmers and agricultural families during the winter.

Sources of Strength (2019-ongoing) This is a program that develops peer leaders to be agents of change within the Richland School District (RSD). RSD teaches students about prevention and positive choices.

Peer Support Specialists (2020) Southwestern Wisconsin Community Action Program (SWCAP) worked with the The Richland Hospital and Clinics (TRHC) Emergency Department in 2020 to establish an ED2Recovery program where trained Peer Support Specialists were on-call to come to the emergency room when a patient had overdosed in order to connect that person to recovery services as quickly as possible.

School Crisis Case Worker (2021-ongoing) RSD hired a crisis care worker within the school.

Crime Stoppers QR Code (2021-ongoing) RSD students can report things of concern and earn an award by using the QR code.

May Mental Health Awareness Month – WRCO Interview (2021) TRHC Senior Life Solutions (SLS) Director and another participant spoke to raise awareness about mental health. They also discussed the 2021 Virtual Spring Sprout 5K, with the proceeds going toward safeTALK/mental health trainings.

May Mental Health Awareness Display (2021) SLS Director created a display in the lobby of TRHC to help raise awareness about mental health.

Virtual Spring Sprout 5K (2021) This virtual event was held in cooperation with The Richland Hospital Foundation. Proceeds went toward safeTALK presentations/mental health trainings.

SafeTALK Train the Trainer (2021) TRHC SLS Director completed Train the Trainer safeTALK training to become a trainer/presenter.

MENTAL HEALTH NEEDS IN THE COMMUNITY *(continued)*

First Richland Community Coffee Club (2021)

TRHC SLS and Pine Counseling collaborated and held the first Coffee Club where all are welcome, but with focus on elderly who need interaction. This free event is held the first Thursday of every month at the Woodman Senior Center and the Community Center in Richland Center from 8-10 a.m.

SafeTALK Trainings (2021) TRHC SLS Director along with a member of Behavioral Health Partnership provided safeTALK trainings (Talk, Ask, Listen, Keep Safe) to teach others how to become more suicide aware and how to help someone who may be struggling with thoughts of suicide.

- August: 20 participants attended at the Park Street Christian Church

Suicide Awareness Display (2021) TRHC SLS Director created a display in the hospital lobby to help raise awareness about suicide prevention.

Winter Blues (2021) TRHC SLS Director provided a mental health educational presentation on the winter blues to the tenants at Ridgeview Commons.

Winter Blues (2021) TRHC SLS Director provided a mental health educational presentation on the winter blues to the tenants at Tom Woodman Villa.

May Mental Health Awareness Month – WRCO Interview (2022) TRHC SLS Director and another participant spoke to raise awareness about mental health. They also discussed the Virtual Spring Sprout 5K, with the proceeds going towards safeTALK/mental health trainings.

May Mental Health BINGO (2022) TRHC SLS Director provided a mental health educational presentation on May Mental Health BINGO to the tenants at Tom Woodman Villa.

May Mental Health Displays (2022) TRHC SLS Director developed mental health displays to raise awareness in multiple TRHC locations:

urgent care clinic waiting area; 2nd floor clinic reception area; 3rd floor clinic reception area; and, 4th floor rehab reception area.

Spring Sprout 5K (2022) This live event was coordinated by The Richland Hospital Foundation and TRHC; approximately 35 attendees. Proceeds went toward safeTALK/mental health trainings.

May Mental Health BINGO (2022) TRHC SLS Director provided a mental health educational presentation on May Mental Health BINGO to the tenants at Ridgeview Commons.

SafeTALK Trainings (2022) TRHC SLS Director along with a member of SWCAP provided safeTALK trainings (Talk, Ask, Listen, Keep Safe) to teach others how to become more suicide aware and how to help someone who may be struggling with thoughts of suicide.

- June: 12 participants attended at TRHC
- September: 29 participants attended at The Reedsburg Area Medical Center
- September: 18 participants attended at TRHC

Suicide Awareness Display (2022) TRHC SLS Director created a display in the hospital lobby to help raise awareness for suicide prevention.

Suicide and Prevention Awareness Month – WRCO Interview (2022) TRHC SLS Director discussed September being Suicide Prevention Awareness Month and the upcoming safeTALK trainings.

September Suicide Awareness and Prevention BINGO (2022) TRHC SLS Director provided a mental health educational presentation on suicide awareness and prevention at Tom Woodman Villa.

September Suicide Awareness and Prevention BINGO (2022) TRHC SLS Director provided a mental health educational presentation on suicide awareness and prevention at Ridgeview Commons.

Trauma Informed Communities (2022)

UW-Madison Division of Extension Richland County hosted a roundtable and community book read of *What Happened to You*.

Southwest Behavioral Health Partnership

(ongoing) TRHC SLS Director participated in Southwest Behavioral Health Partnership monthly meetings and assisted in the development and planning of their annual Mental Health Summits, which were virtual in spring of 2021 and 2022. Planning is underway for a hybrid summit in 2023.

Always in Our Hearts Rotary Lights Tree

(ongoing) Ornaments to honor specific little ones who have gone too soon are hung on a tree in Rotary Lights in the Park (Richland Center) every November/December, by request of the families. Ornaments are provided to the families in January if they choose.

Always in Our Hearts Infant Loss Memorial

Service (ongoing) An annual memorial service is held on the first Monday of December at the Clary Memorial Funeral Home for anyone who has experienced infant loss at any time. There

is also an annual burial in the Richland Center Cemetery with a marker donated by Clary's.

Resolve Through Sharing (ongoing) Three staff members of TRHC have completed this training and have, in turn, trained other clinical staff members in order to provide support to families.

Richland Community Free Clinic (ongoing)

The care provided at the clinic (primary care, laboratory and diagnostic testing, immunizations, resource provision, etc.) helps bridge the health care gap for uninsured individuals, including those who are undocumented.

Technology Screening Tools (ongoing)

The Richland School District uses technology screening tools called Bark and Aristotle. These tools flag concerning messages sent via email or search engines. Students are then linked to a school administrator or counselor and the concern is followed up upon.

Suicide Awareness Billboard (2022) TRHC has dedicated a billboard to the promotion of #988 Suicide and Crisis Lifeline. The billboard is located near Sextonville.

SUBSTANCE ABUSE NEEDS IN THE COMMUNITY

Federal Drug Free Communities (DFC) Grant (2019) This grant was awarded to Partners for Prevention (P4P) with Richland School District (RSD) as the fiscal agent. The 5-year DFC grant is renewable for an additional five years. P4P continues to align with the Richland County Children and Family Advocacy Council (RCCFAC).

Sources of Strength (2019-ongoing) This is a program that develops peer leaders to be agents of change within the RSD; teaching students about prevention and positive choices.

P4P Expands Capacity to Include Work Groups (2019-22) P4P meets monthly and expands capacity to include work groups (Data, Alcohol, Tobacco, and Rx Drugs) which also meet monthly.

Drug Take Back Days (2019-2022) P4P hosts two per year. More than 200 lbs. of unwanted/unused medications were collected per event (see below). Lock bags, deactivation kits, and medication disposal envelopes were also distributed, and there is funding to install a permanent drug drop box in Lone Rock, if requirements can be met.

- | | |
|----------------|--|
| a. Spring 2019 | 209 lbs. |
| b. Fall 2019 | 139.6 lbs. |
| c. Fall 2020* | 355.8 lbs. (only one Drug Take Back Day, so pounds are inflated) |
| d. Spring 2021 | 250.6 lbs. |
| e. Fall 2021 | 190.6 lbs. |
| f. Spring 2022 | 247.8 lbs. |
| g. Fall 2022 | 257.8 lbs. |

Youth4Change (2020) The Richland and Ithaca School Districts organize youth leadership coalitions called "Youth4Change" to address local conditions to prevent youth substance use.

"Prevention Happens Here" (2020) P4P hosts a six-session virtual series called "Prevention Happens Here" with The Richland Hospital and Clinics (TRHC) local expert health care

providers (Andy Wright, MD, and David May, MD), parents (Lara Carpenter), youth (Mira Carpenter), and a treatment provider (Sue Larson). Presentations on Meth Use, Tobacco (Vaping) Use, Underage Drinking, and "Hidden in Plain Sight" drug awareness program.

NARCAN Trainings (2020) P4P and the Richland Center Police Department (RCPD) conducted four NARCAN Trainings and distributed doses of NARCAN in the county through partnering agencies.

Key Informant Interviews With Community (2020) P4P conducts Key Informant Interviews with community to select community-level risk factors and develop strategic plans to address youth substance use, with prioritization of underage drinking, youth misuse of Rx drugs, tobacco (vaping), and marijuana.

Alcohol Age Compliance Checks (2020) P4P conducts Alcohol Age Compliance Checks in the City of Richland Center. A memorandum of understanding is signed by local law enforcement for the purpose of sustaining ongoing checks in the county. Ongoing biannual checks continue into 2022.

CADCA's Mid-Year Training on Key Essentials for Prevention (2020-22) Twenty-three Richland County Youth4Change leaders attend this training hosted by Community Anti-Drug Coalitions of America (CADCA).

"Most of Us Don't" Campaign (2020-22) Youth4Change partners with WRCO radio to create radio PSAs to address youth misuse of Rx drugs and the prevention of underage drinking.

Media Campaign to Reduce Underage Drinking (2020-22) The P4P Alcohol Workgroup implemented a community-wide media campaign to reduce underage drinking. Radio ads, newspaper articles, messages to parents, billboards, and yard signs were part of the strategy. The campaigns include "Parents Who Host Lose the Most" and "Not In My House."

General Youth Substance Use Prevention Information Campaign (2020-22) P4P provided general youth substance use prevention information for parents via school newsletters, newspaper articles, WRCO's Morning Show, and regular social media posts.

"Your Choice to Live" School Assembly (2021) Guest Speaker from "Your Choice to Live" conducted a school assembly at Richland Center High School (RCHS).

Assessment of Community Events (2021) P4P conducted an assessment of ten community events in the county. Follow-up presentations were provided to Boaz, Viola, and Richland Township Boards to encourage alcohol restrictions at community events.

School Crisis Case Worker (2021-ongoing) RSD hired a crisis care worker within the school.

Crime Stoppers QR Code (2021-ongoing) RSD students can report things of concern and earn an award by using a QR code.

Annual Night Out (2021-22) In collaboration with local law enforcement, P4P hosted the first and second annual National Night Out at the UW-Platteville/Richland campus.

- a. 275 attended in 2021
- b. 525 attended in 2022

Permanent Drug Drop Boxes (2021-22) Four new permanent drug drop boxes were installed in Richland County (Municipal Building, Sheriff's Department, Center Pharmacy, and Viola Village Hall).

Key Informant Interviews With Health Care Providers (2022) P4P conducted Key Informant Interviews with health care providers to gather data related to prescribing practices.

Alternative to Suspension (2022) The American Heart Association (AHA) supported P4P's efforts to adopt an Alternative to Suspension policy in the county. Ithaca Youth4Change provided education and awareness to the Ithaca School Board which voted to approve the policy in June.

"Small Talks" Underage Drinking Media Campaign (2022) P4P conducted underage drinking media campaign called "Small Talks."

"Operation Parent" Handbooks (2022) P4P's parent sector leader coordinated strategy to distribute "Operation Parent" handbooks to every parent and second parent in Richland County.

Tobacco-Free Parks Policy (ongoing) Youth4Change and P4P continue to provide information and raise awareness to the Richland Center City Council and Park Board in support of a proposed Tobacco-Free Parks policy. The strategy is supported by G.R.A.C.E., Richland County Health and Human Services, and Andy Wright, MD.

Addiction Medicine Treatment (ongoing) Currently, five providers at the Muscoda Health Center and The Richland Hospital Clinic continue to provide addiction medicine treatment.

Richland Community Free Clinic (ongoing) The care provided at the clinic (primary care, laboratory and diagnostic testing, immunizations, resource provision, etc.) helps bridge the health care gap for uninsured individuals, including those who are undocumented.

Technology Screening Tools (ongoing) The RSD uses technology screening tools called Bark and Aristotle. These tools flag concerning messages sent via email or search engines. Students are then linked to a school administrator or counselor and the concern is followed up upon.

OBESITY PREVENTION AND TREATMENT NEEDS IN THE COMMUNITY

Lunch and Learn (2020) This diabetes/nutrition education event was held at Rockwell Automation.

March National Nutrition Month (2020-2022) Healthy nutrition education was shared via blog posts, The Richland Hospital and Clinics (TRHC) social media accounts, WRCO interviews, and Richland Observer articles.

COVID-19-Related Blog Posts (2020) These focused on immune health, food safety, and eating.

Let Food Be Your Medicine (2020) A video was shared promoting healthy eating choices.

TOPS Group (2020) A registered dietitian from TRHC spoke at the local TOPS (Take Off Pounds Sensibly) group about healthy eating.

November National Diabetes Month (2020-2022) Diabetes education was shared via WRCO interviews, blog posts, social media posts, and Richland Observer articles.

Wellness Network (2021-2022) TRHC's repository of health videos was shared via a WRCO interview, social media posts, and a Richland Observer article.

Wellness Presentation (2021) A presentation on aspects of wellness was given to Ridgeview Commons residents.

Diabetes Presentation (2021) A presentation on diabetes was provided to Ridgeview Commons residents.

Spring Sprout 5K Fun Run/Walk (Virtual in 2020; Live in 2021) Sponsored by TRHC and Richland Hospital Foundation, this event encourages healthy activity in staff and community members. Approximately 35 individuals participated. Proceeds fund the safeTALK program (Mental Health).

Wisconsin Healthy Communities Bronze Award (October 2021) Richland County was

awarded the Bronze designation for Wisconsin Healthy Communities. There is a road sign pending to promote this for Richland County.

Bike Safety/Community Safety Day (2021-2022) Sponsored by Richland FIT in partnership with The Brewer Public Library and other community partners, this brought a bike-safety course and free helmets back to the community each summer. Helmets were sponsored by Julie Cairns State Farm Insurance.

Nutrition and Diabetes Management Presentation (2022) A presentation on healthy nutrition and managing diabetes was given to Ridgeview Commons residents.

Low Sodium and Pre-Diabetes Presentation (2022) A presentation on low-sodium nutrition and pre-diabetes was given to Ridgeview Commons residents.

Aftercare Diabetes In-service (2022) An in-service was held for TRHC Senior Life Solutions (SLS) participants.

Bike Path to the Richland Intermediate School This contributes to environmental changes in our community related to healthy activity. Southwest Partners has dedicated efforts to community trails as well.

School Wellness Policies (ongoing) Richland FIT continues to work with RSD and the Ithaca School District (ISD) on wellness policies.

Milk Depot (ongoing) Community women can donate breast milk. There is also donor milk available in the TRHC Birth Center for infants who need it.

The Richland County Breast Feeding Coalition (ongoing) This is up and running again post-COVID and offers support for area employers to facilitate time and a location for employees to pump while at work.

Get Fit Program (ongoing) Sponsored by Richland Hospital Clinic (RHC), this provides patients with medical management of obesity, and/or lifestyle modification counseling such as discussion on dietary changes, exercise, and weight monitoring and accountability.

Richland Community Free Clinic (ongoing) The care provided at the clinic (primary care, laboratory and diagnostic testing, immunizations, resource provision, etc.) helps bridge the health care gap for uninsured individuals, including those who are undocumented.

2022 CHNA PROCESS

Health Assessment and Wellness Commission (HAWC) recognized the collective efforts being made in the community to address the prioritized health needs identified in the 2019 CHNA. That recognition in conjunction with secondary and primary quantitative and qualitative data were important considerations taken into account in creating the 2022 CHNA. The 2022 HAWC was made up of members of the partner organizations and includes the following individuals. Our greatest thanks to all who participated and to those whose names appear in **BOLD** for having served on HAWC for six years or more.

RICHLAND HOSPITAL AND CLINICS OVERVIEW

The Richland Hospital and Clinics (TRHC) was founded in 1924. Today, it is a 25-bed Critical Access Hospital on a 164,000-square-foot campus in Richland Center, WI (Richland County, WI). It serves those who are representative of the population of Richland County. The hospital offers: inpatient medical care; outpatient medical care; a swing-bed program; general, orthopedic, gynecological, ophthalmological and podiatric surgery; emergency medical services; rehabilitation services (physical therapy, occupational therapy, speech therapy, cardiac rehabilitation, pulmonary rehabilitation, sports medicine and wound care); medical imaging; pharmacy; intensive outpatient behavioral health counseling for seniors; laboratory services; intensive care medicine; diabetes education; and specialty medical services.

TRHC owns and operates three rural health clinics. One is located in Richland Center, WI (Richland County, WI), another in Spring Green, WI (Sauk County, WI) and the third is located in Muscoda, WI (Grant County, WI). The clinics provide primary medical care and preventative wellness care.

Committed to "Soaring to Excellence," TRHC embraces 7 C's of Culture. The 7 C's include: customer service, communication, commitment, compassion, competence, civility, and community. The hospital has an employee-driven Soaring Team called Community Connections. This team oversees the Community Health Improvement Plan (CHIP) and supports priority champions as they work with hospital staff and community members to improve the health and wellness of the people they serve. In addition, they work to make sure TRHC maintains its integration in supporting the community.

DEFINING OUR COMMUNITY

The Richland Hospital and Clinic's (TRHC) primary service area is defined geographically with zip codes, including Blue River (53518), Lone Rock (53556), Muscoda (53573), Richland Center (53581), and Spring Green (53588).

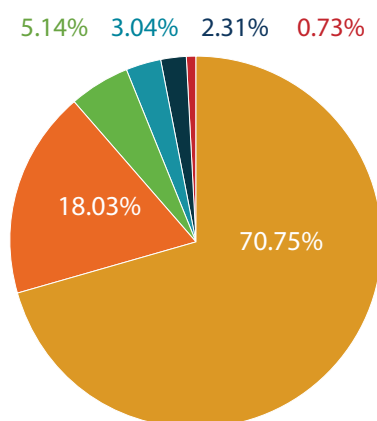

We designate these areas as our primary service area based on traditional definitions (>50% of market) and based on the geographic location of the hospital and its two rural health clinics. For the purposes of this assessment, however; we will be using Richland County as our definition of Community. Our partners in this process are Richland County-based and more data is available at a county level than at the zip-code level. In addition, nearly 70% of patients using The Richland

Hospital, Inc. reside in Richland County. The data below was taken from Kaavio. (Kaavio combines statewide healthcare data from Wisconsin Hospital Association Information Center (WHAIC) in a web-based support engine that allows us to analyze our market.)

It is important to note that residents from our Primary Service Area and Richland County seek services in surrounding communities, as well as in Madison, WI and La Crosse, WI. Equally important to note, is that residents outside the Primary Service Area and Richland County seek healthcare services from the Richland Hospital and Clinics. In addition, strong Community Health Needs Assessments are regularly conducted in Sauk and Grant Counties.

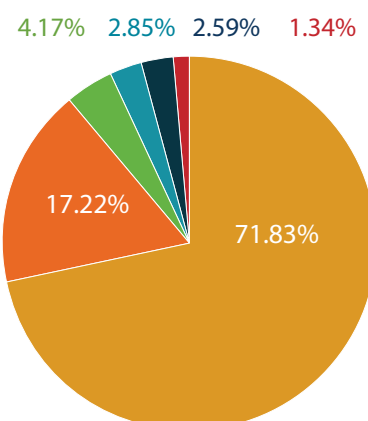

% OF INPATIENT CASES AT THE RICHLAND HOSPITAL BY COUNTY

The identified counties represent 98.15% of The Richland Hospital's market. The remaining 1.85% of Inpatient Cases come from additional counties. This represents data from Quarters 2, 3 & 4 of 2021 and Quarter 1 of 2022.

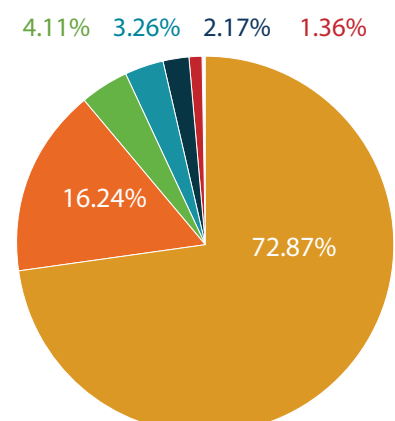

% OF OUTPATIENT CASES AT TRHC BY COUNTY

The identified counties represent 98.62% of TRHC's market. The remaining 1.38% of Outpatient Cases come from additional counties. This represents data from Quarters 2, 3 & 4 of 2021 and Quarter 1 of 2022.

% OF EMERGENCY DEPARTMENT CASES AT THE RICHLAND HOSPITAL BY COUNTY

The identified counties represent 96.32% of The Richland Hospital's market. The remaining 3.68% of Emergency Department Cases come from additional counties. This represents data from Quarters 2, 3 & 4 of 2021 and Quarter 1 of 2022.

RICHLAND COUNTY HEALTH ASSET ANALYSIS

TRHC is the only hospital in Richland County. It joins one primary medical clinic, two rural health clinics, one mental health facility, and Health and Human Services in caring for people in this area. There is a free clinic, but it is not a Federally-Qualified Health Center.

ASSESSMENT PROCESS AND METHODS

Secondary and primary data were collected to complete the CHNA. Secondary data were collected from a variety of local, county, and state sources to present community demographics, social determinants of health, health care access, birth characteristics, leading causes of death, acute and chronic disease, health behaviors, mental health, substance use and misuse, and preventive practices. The analysis of secondary data yielded a preliminary list of significant health needs, which then informed the primary data collection.

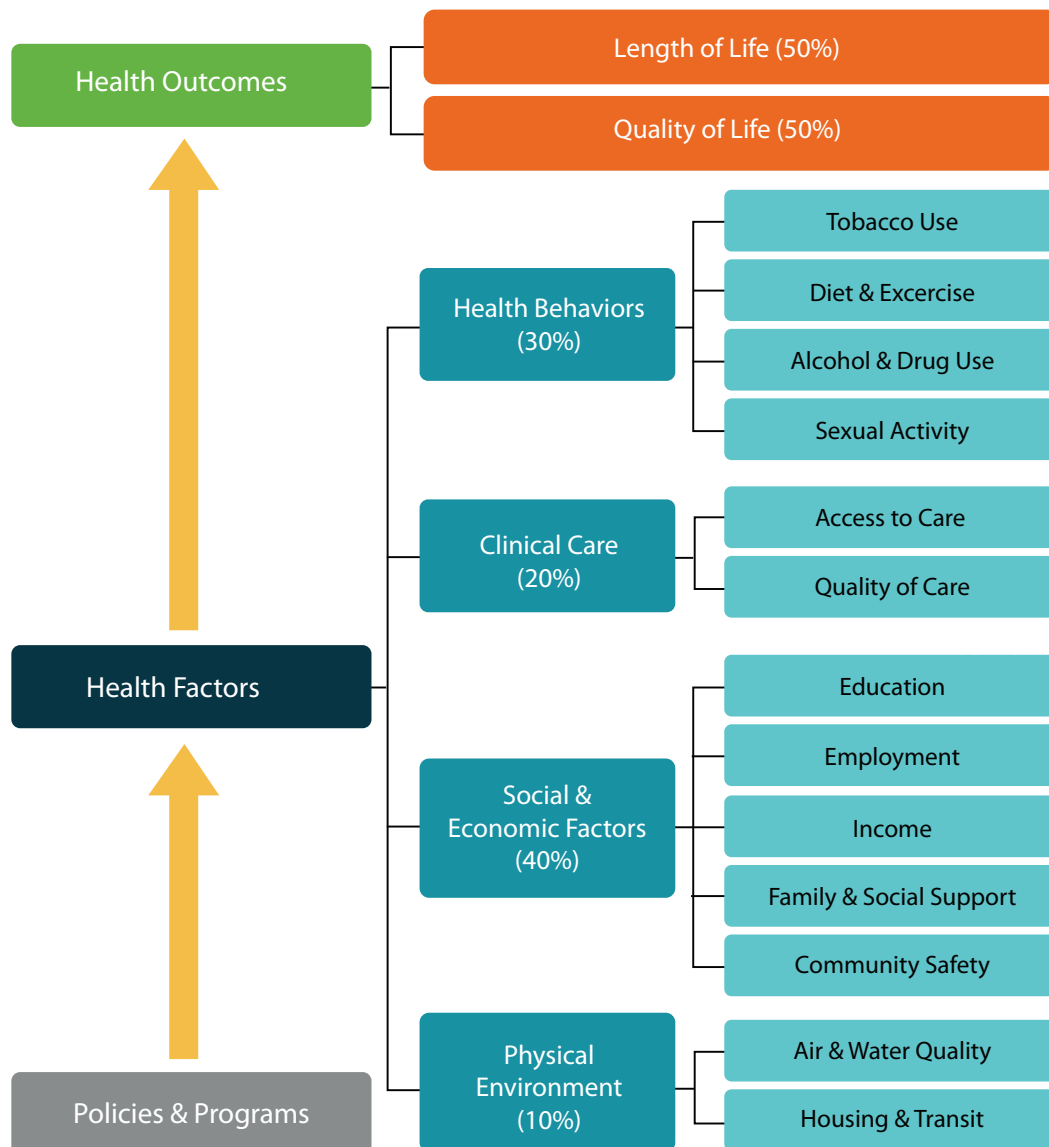

SECONDARY QUANTITATIVE DATA

UNIVERSITY OF WISCONSIN POPULATION HEALTH INSTITUTE. COUNTY HEALTH RANKINGS & ROADMAPS 2022

Community health is impacted by many factors that happen outside of healthcare facilities. The County Health Rankings Model below illustrates how multiple factors influence the quality of an individual's life.

County Health Rankings & Roadmaps, a collaboration between the University of Wisconsin Population Health Institute and the Robert Wood Johnson Foundation, is working to improve health outcomes for all and to close the health gaps between those with the most and least opportunities for good health. This work is rooted in a deep belief in health equity, the idea that everyone has a fair and just opportunity to be as healthy as possible, regardless of race, ethnicity, gender, income, location, or any other factor.

County Health Rankings model © 2014 UWPHI

COUNTY HEALTH RANKINGS & ROADMAPS OFFERS AREAS TO EXPLORE

According to County Health Rankings & Roadmaps, **Areas to Explore** highlights measures that are potential challenges our community may want to examine more closely. Accounting for the relative impact of each measure on health outcomes, County Health Rankings used a variety of techniques to identify the Health Factor measures for our county that seem to have the greatest potential opportunity for improvement. They identified measures where there are meaningful differences between Richland County's values and the Wisconsin average—the national benchmark—or the state average in the best state.

The 2022 County Health Rankings and Roadmaps recommend **"Areas to Explore"** as a starting point in the journey toward improving health in our community.

Adult Smoking

- Percentage of adults who are current smokers.

Adult Obesity

- Percentage of the adult population (age 20 and older) that reports a body mass index (BMI) greater than or equal to 30 kg/m2.

Excessive Drinking

- Percentage of adults reporting binge or heavy drinking.

Food Environment Index

- Index of factors that contribute to a healthy food environment.

Physical Inactivity

- Percentage of adults age 18 and over reporting no leisure-time physical activity (age-adjusted).

Access to Exercise Opportunities

- Percentage of population with adequate access to locations for physical activity.

Uninsured

- Percentage of population under age 65 without health insurance.

Mammography Screening

- Percentage of female Medicare enrollees ages 67-69 that receive mammography screening.

High School Completion

- Percentage of adults ages 25 and over with a high school diploma or equivalent.

Some College

- Percentage of adults ages 25-44 with some post-secondary education.

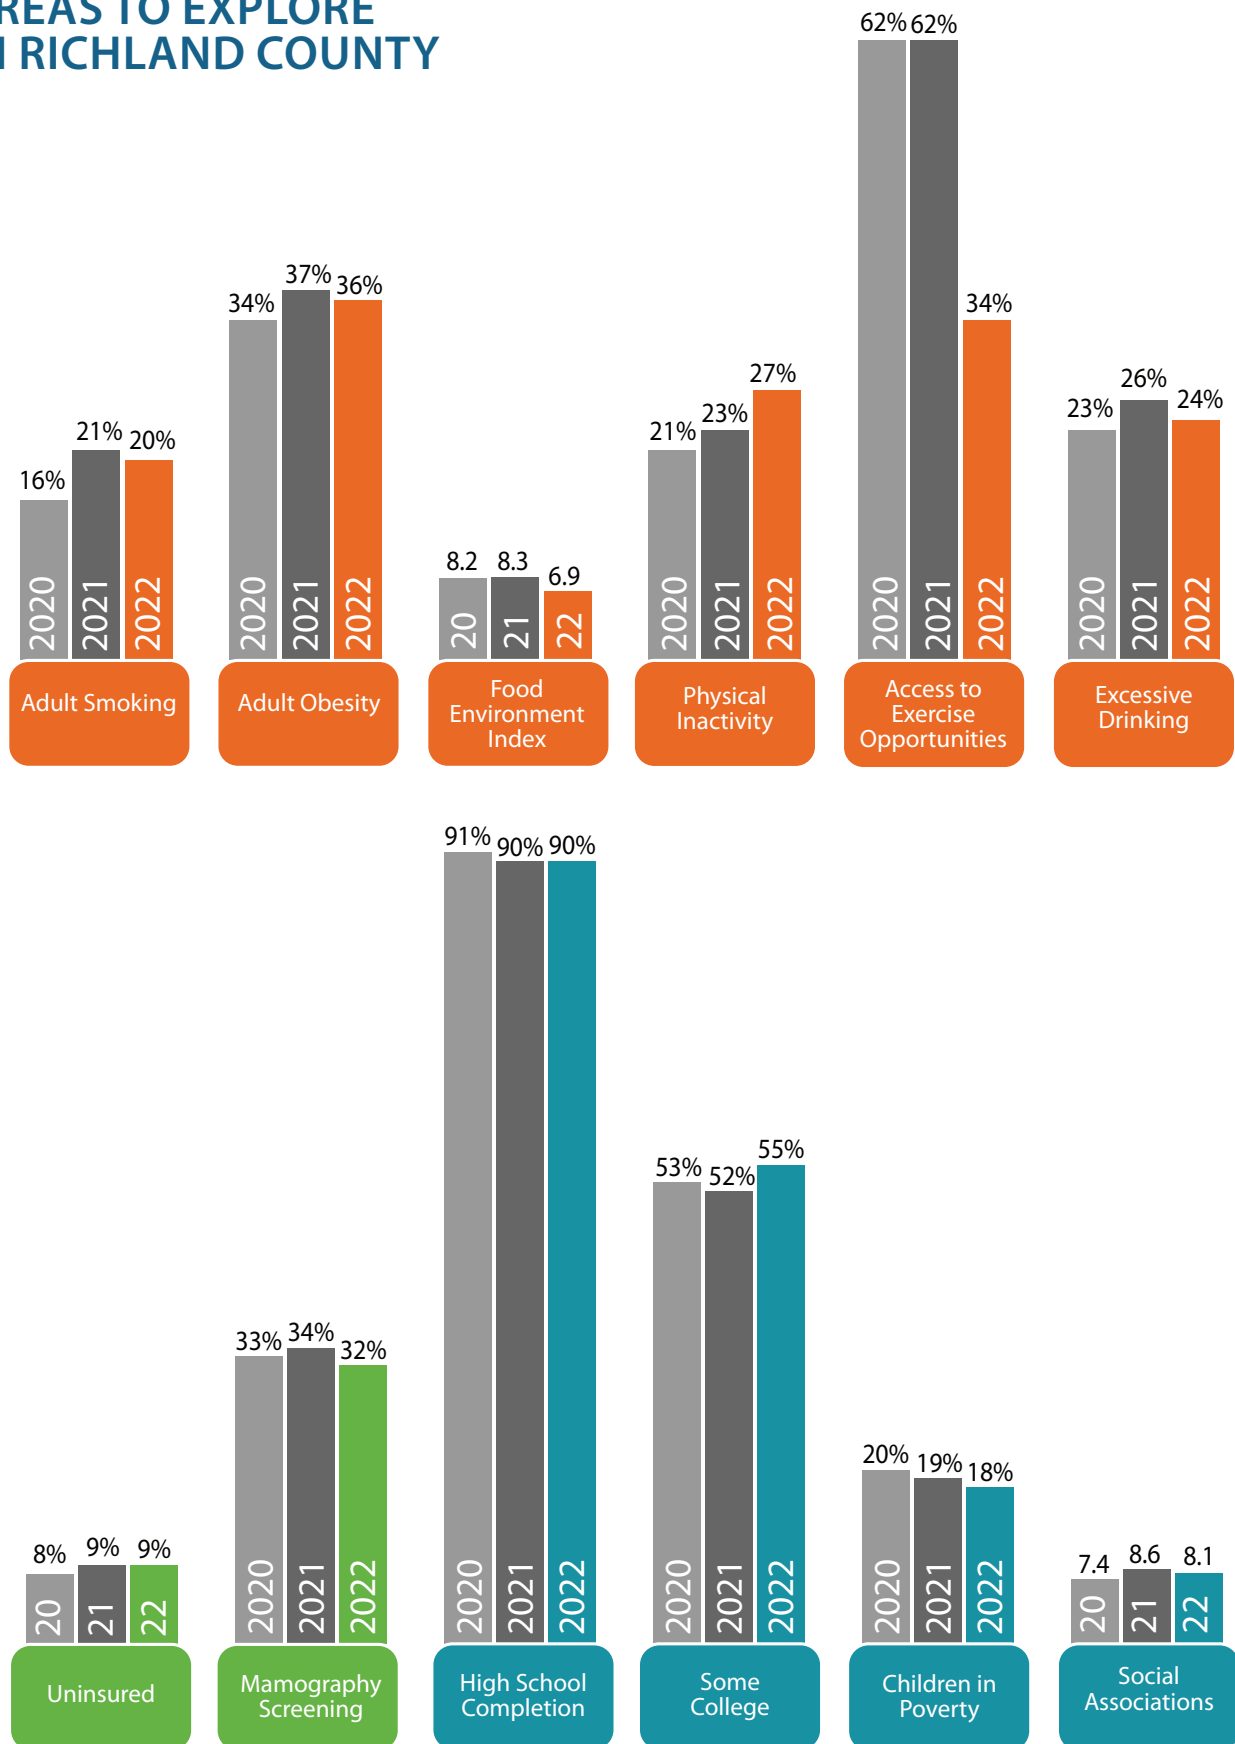

Children in Poverty

- Percentage of people under age 18 in poverty.

Social Associations

- Number of membership associations per 10,000 population.

PRIMARY DATA

COMMUNITY HEALTH SURVEY

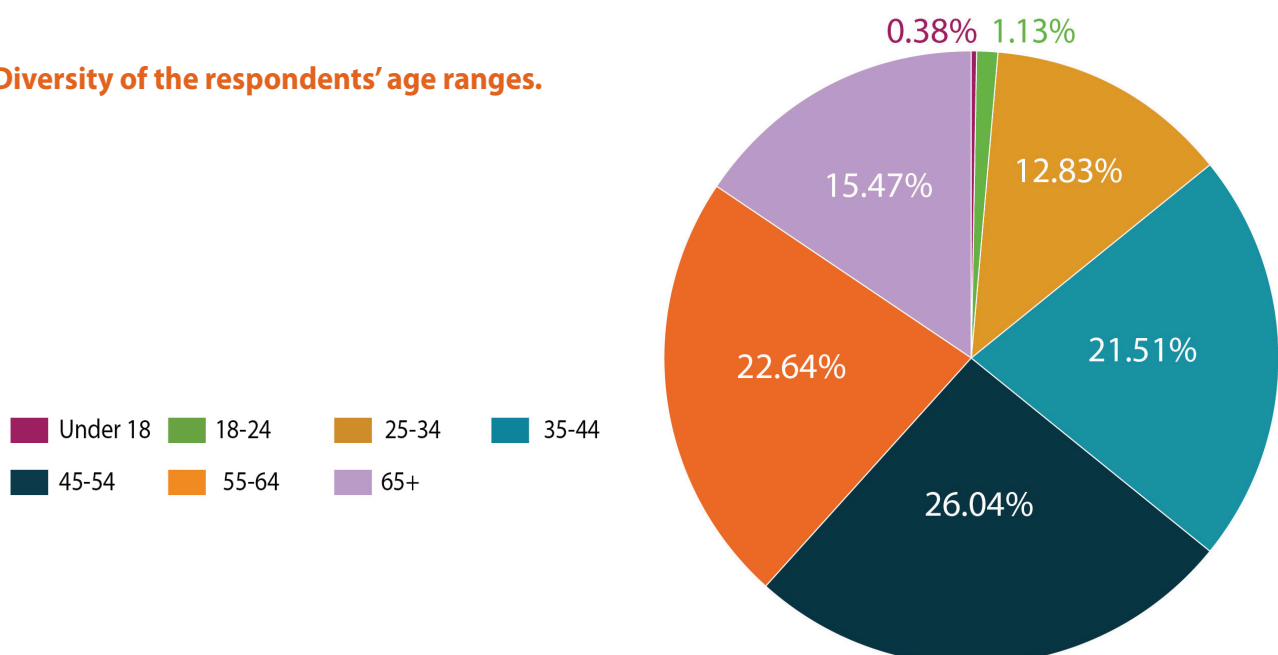

The community health survey was available to the public from **August 15 through October 21, 2022**. It was available in English and Spanish. The survey was promoted on social media, via email, newspapers, corporate newsletters, in print and via radio ads. Two hundred sixty-six surveys were completed; 15 in Spanish and 251 in English.

Who does the survey data represent?

Nearly 80% of the respondents were from Richland County.

Diversity of the respondents' age ranges.

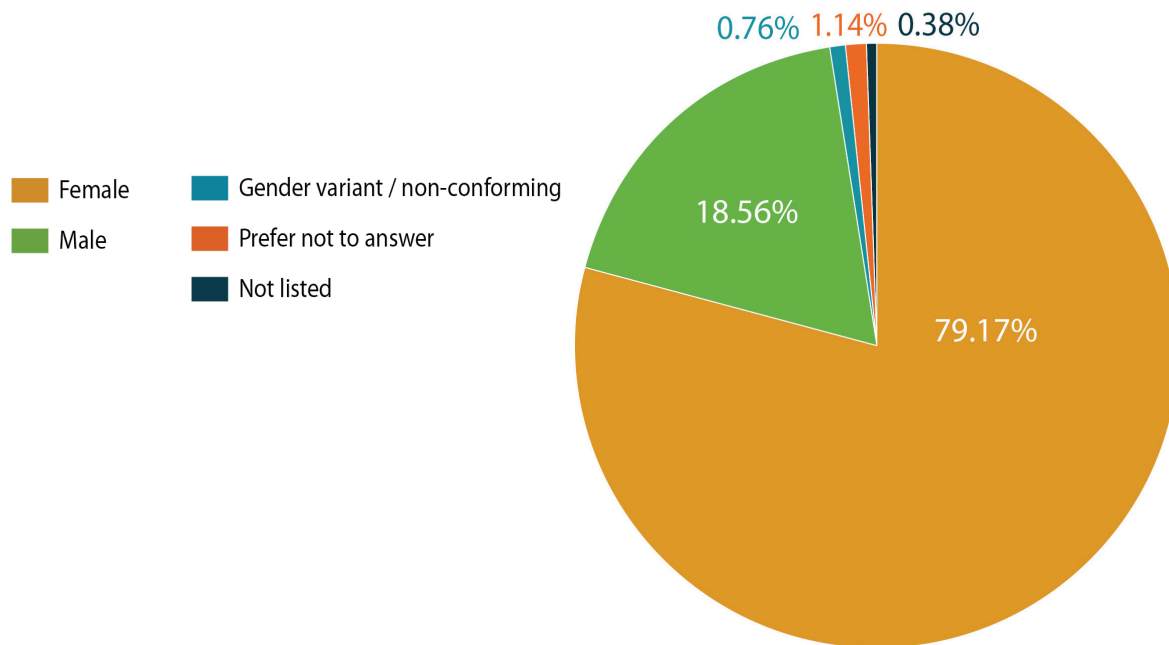

Appendices K1, K2, L1, L2

Women were the majority of the survey respondents.

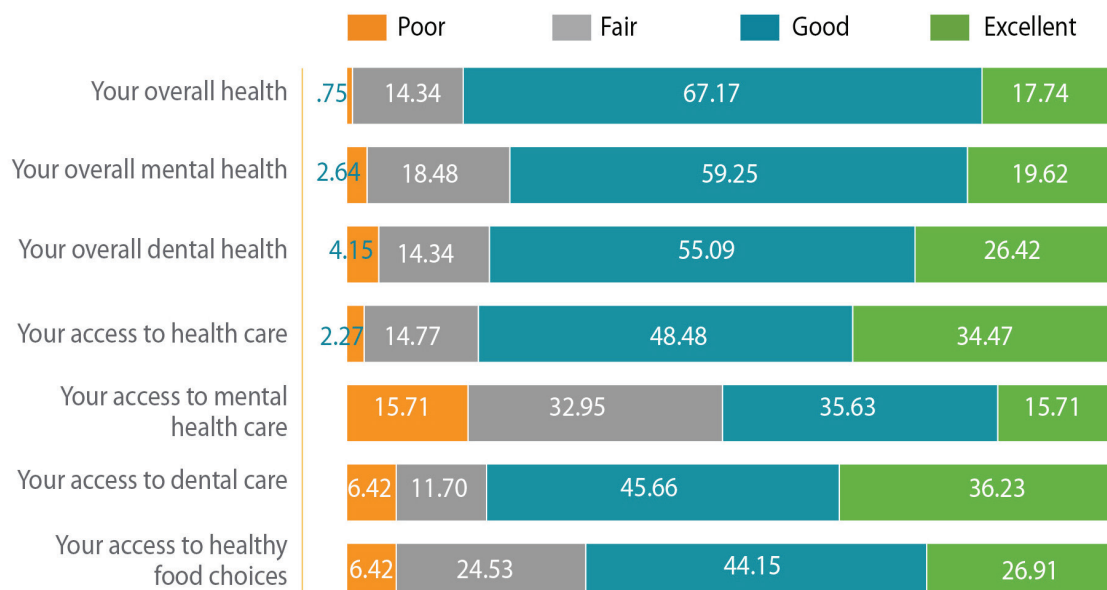

In 2019, 11.4% of respondents in the Community Survey identified themselves as men. In 2022, there was more diversity in the gender of the respondents.

Respondents' self-evaluation of health aspects.

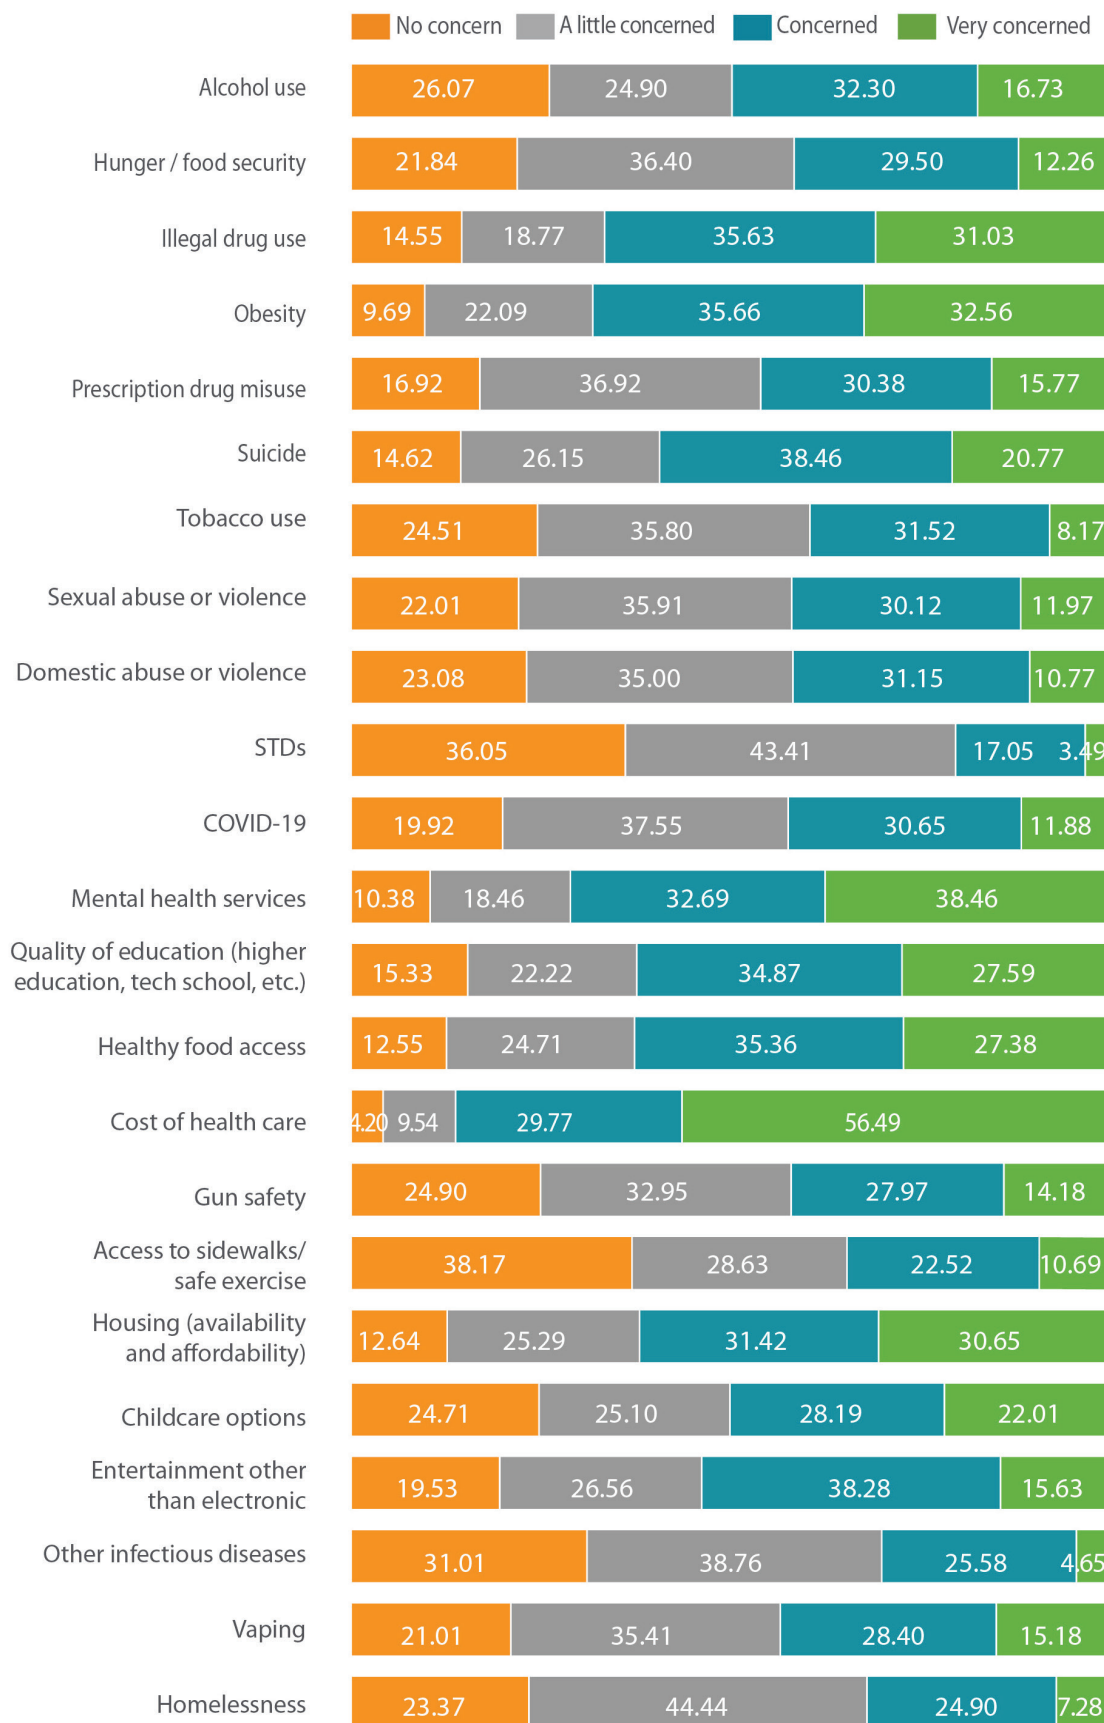

Consistent with Community Survey results in 2019, 2022 respondents listed access to mental health care and access to healthy food choices as the larger concerns.

Thinking of the following aspects of health, how would you rate each?

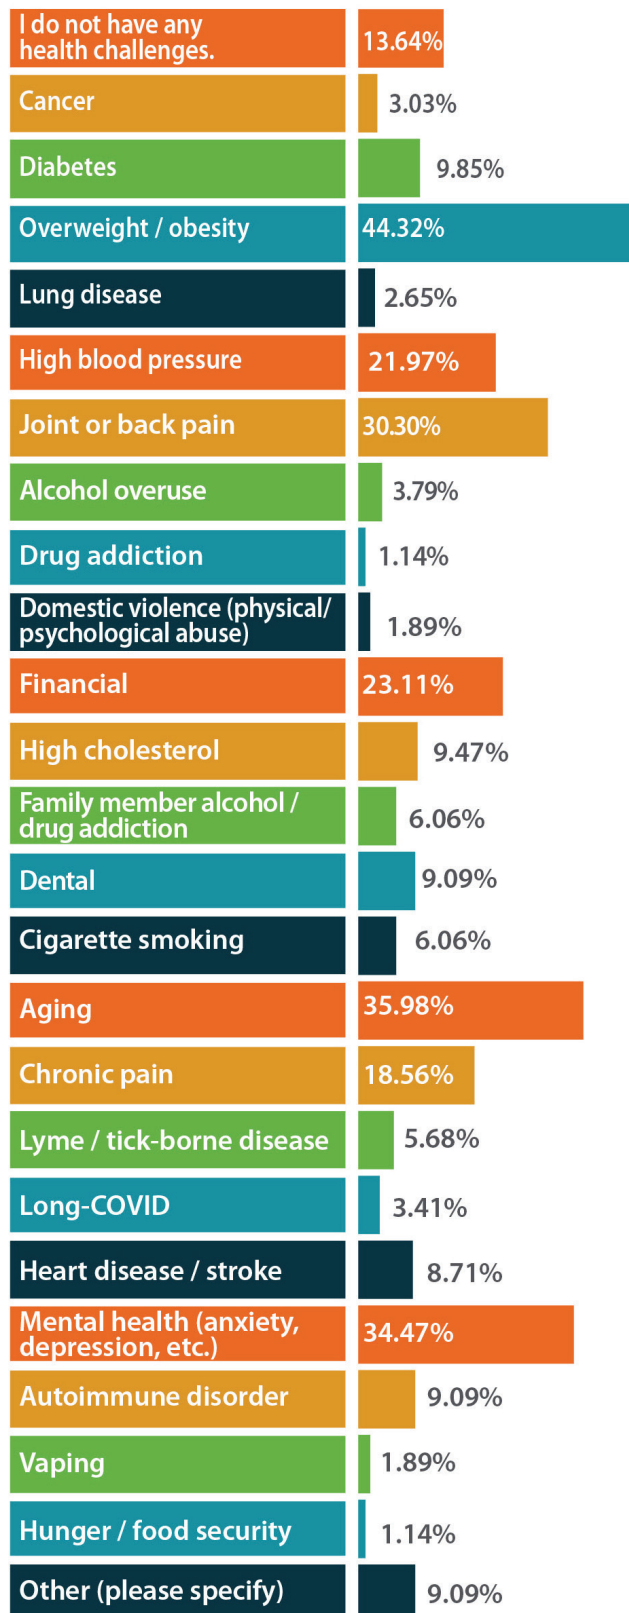

Respondents' evaluation of concerns they have with specific issues in their community.

Health care costs, mental health and obesity are the respondents' greatest concerns.

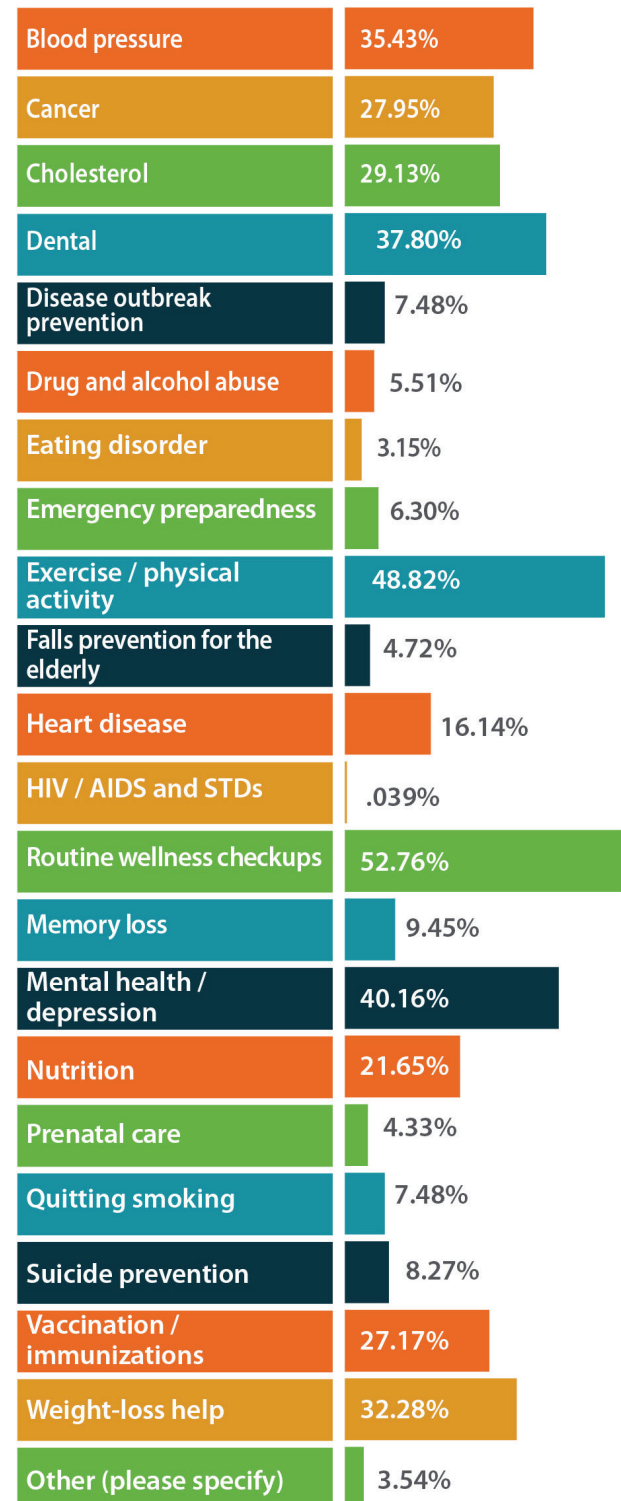

Respondents chose up to five health challenges they face. Overweight/obesity, aging and mental health issues were the three challenges chosen the most.

Respondents chose up to five health screenings or services they felt would improve their health or the health of their family.

Routine wellness checkups, exercise/physical activity, and mental health screenings received the most responses.

RICHLAND COUNTY HEALTH AND HUMAN SERVICES (HHS) QUANTITATIVE DATA

Richland County Health and Human Services collects data for each service area and posts its Annual Report each spring for review by Richland County residents.

In carrying out its mission, all agency staff and programs shall:

- Treat others fairly and with respect in a friendly, courteous, responsive and confidential manner.
- Demonstrate integrity and commitment in all actions.
- Create an environment of hope and positive expectation.
- Recognize and respect the uniqueness of individuals and families and foster collaborative decision-making.
- Value diversity.
- Provide individualized services in the least intrusive and least restrictive manner possible.
- Promote collaboration within the agency and with community partners.
- Provide quality services through continuous improvement and outcome measurement.
- Manage public resources responsibly.

RICHLAND COUNTY BEHAVIORAL SERVICES UNIT

The Behavioral Services Unit provides a continuum of behavioral health services to Richland County residents that range from brief crisis intervention to intensive long-term treatment services. Behavioral Services staff assist individuals and families who are experiencing acute emotional crises, addiction, substance use disorders, short-term mental health issues, or persistent mental illnesses. In 2021, Clinical Services staff assisted 473 individuals in one or more of its programs.

During 2021, Behavioral Health Services continued to be impacted by the pandemic, with spans of time when the agency remained closed to the public, except by appointment. Behavioral Health staff continued to work with clients, through close COVID Screening Procedures and COVID Safety Measures put in place. Staff remained innovative in ways to continue to provide best practice services to clients.

RICHLAND COUNTY HHS CRISIS INTERVENTION SERVICES

Every county in Wisconsin is required to provide emergency mental health and substance abuse services. The types of services that may be provided include:

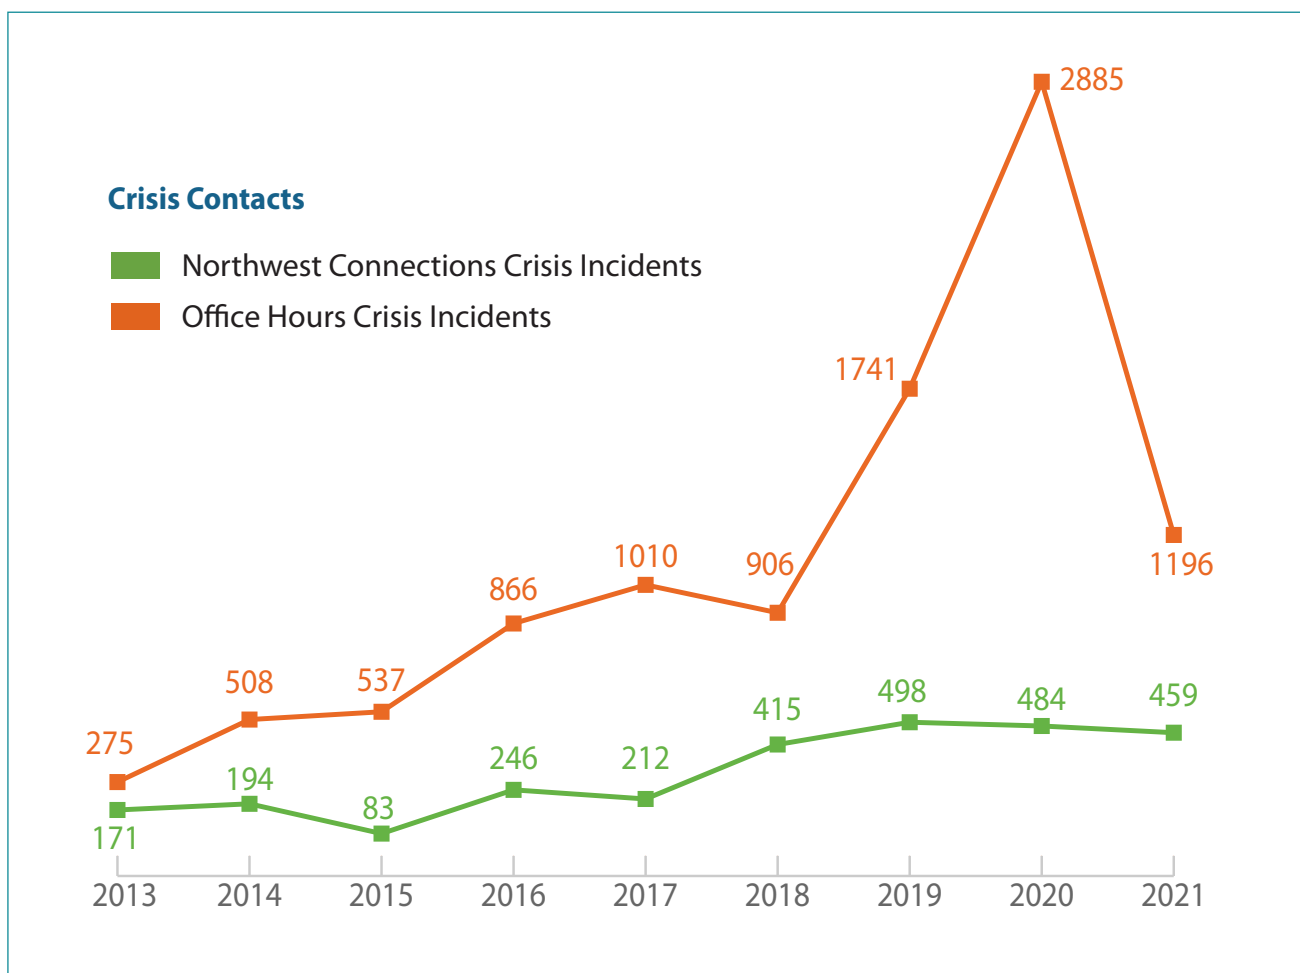

- Evaluation, crisis counseling and mental health care to persons experiencing emotional distress, suicidal ideation or mental health crisis.
- Response to outpatient emergencies related to substance abuse, including the provision for examination and evaluation of a person's need for detoxification.
- Arranging for emergency hospitalization and detoxification when appropriate.

The types of responses to a crisis situation may be conducted by the 24-hour emergency telephone system, walk-in emergency services during business hours, or by mobile response to the crisis location when needed.

CRISIS CONTACTS

In 2021, Health and Human Services provided crisis services to a total of 312 individuals. Some people may have had repeat crises or required additional contacts to address the crisis situation. Northwest Connections handled 459 crisis contacts. Behavioral Health staff completed a total of 1196 daytime crisis contacts, with a total of 1655 crisis contacts altogether in 2021. The total number of crisis contacts includes all crisis assessments and follow up contacts completed by staff. During 2021 the entire Behavioral Health Team shared crisis responsibilities during office hours. Linkage and follow-up services are completed after an initial crisis assessment in order to provide or coordinate services to allow the crisis patients to return to more stable functioning DHS 34.23(6). During 2021, a staff member continued to provide services through a contract with the Richland School District. The staff provided mental health therapy and crisis services to children in the district.

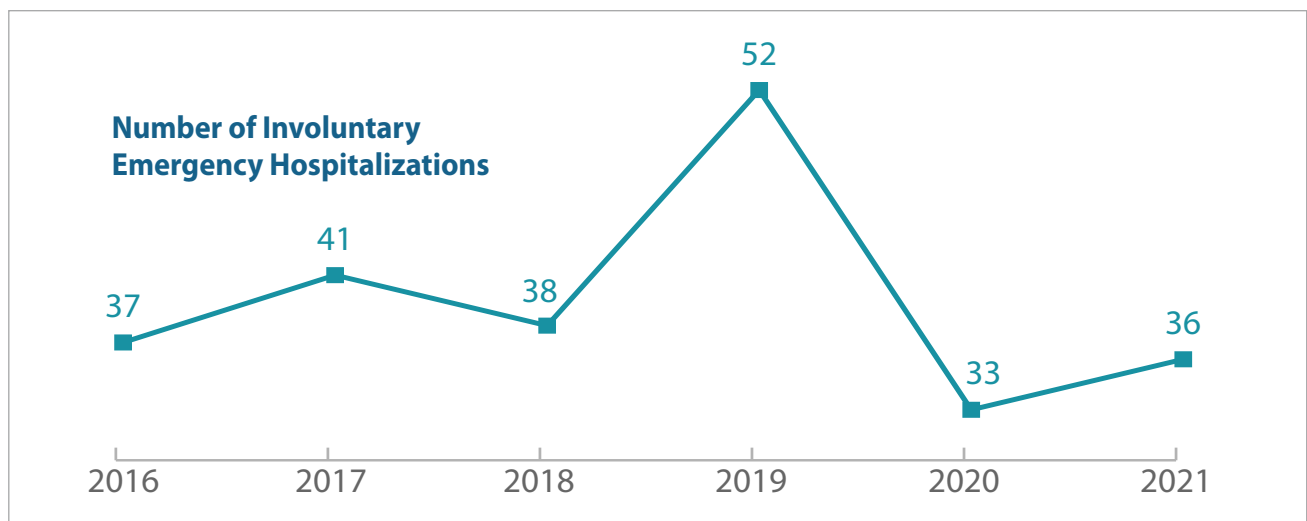

Note: Prior to May 1, 2018, all office hour contacts were provided by County staff. The data reflected prior to 2018 showed after-hours Northwest Connections only. Beginning May 1, 2018, the Northwest data showed phone calls received 24 hours per day.

RICHLAND COUNTY HHS INPATIENT PSYCHIATRIC AND INSTITUTIONAL SERVICES

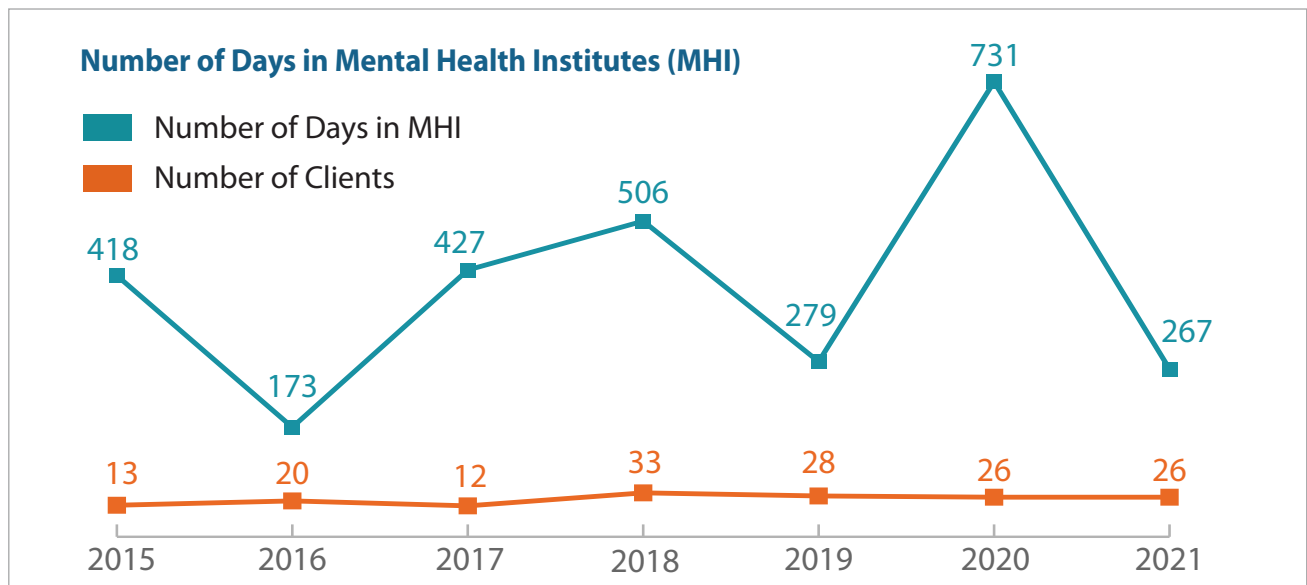

The Behavioral Health Services unit facilitates voluntary and involuntary hospitalization for individuals who need this inpatient psychiatric service. Involuntary hospitalizations (sometimes called emergency detentions) occur when a person is determined to present a substantial risk of harm to him- or herself or to others, due to a suspected mental illness. The person is detained by law enforcement or the court and placed at a psychiatric facility in order to be evaluated. If the person is determined to pose an ongoing risk to him- or herself or to others, a civil commitment process may be pursued to assure that the person gets necessary treatment.

The chart below shows the number of involuntary hospitalizations for the last six years.

RICHLAND COUNTY HHS MENTAL HEALTH INSTITUTIONAL PLACEMENTS

For long-term care and treatment needs in 2021 Richland County placed individuals at Winnebago Mental Health Institute for adults and children. Mendota Mental Health Institute is utilized for geriatric or forensic patients. These facilities were used as a last resort placement when an acute psychiatric unit was not available for emergency hospitalization. The chart below shows the total number of days of institutional care funded annually by Richland County. **5** of the **26** individuals shown in the chart for 2021 were under the age of 21 and accounted for **38** days of care.

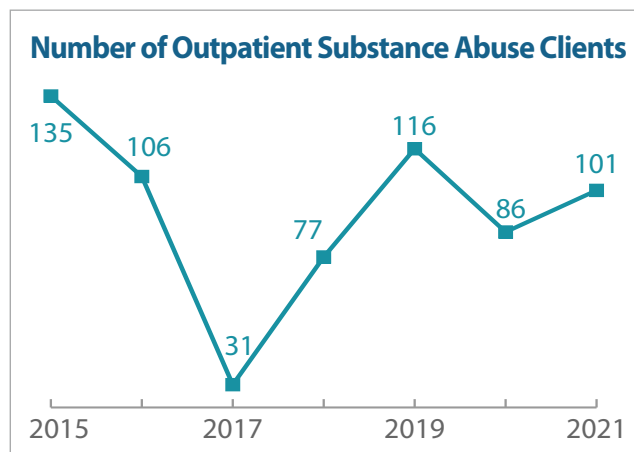

RICHLAND COUNTY HHS SUBSTANCE ABUSE TREATMENT SERVICES

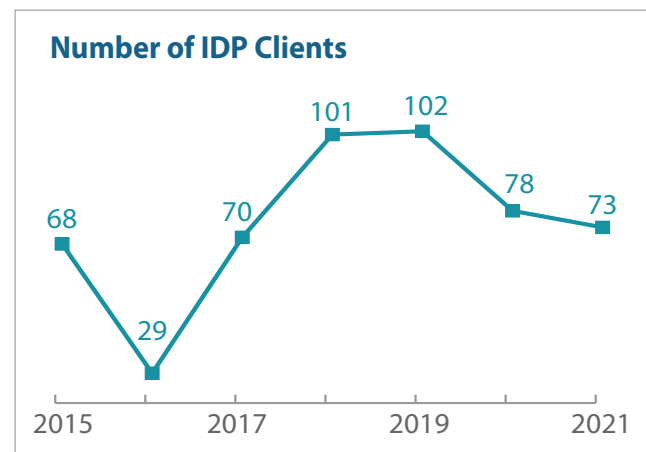

Substance abuse counseling is a specialized treatment focused on assisting individuals to stop or minimize the negative effect of addiction on their lives. In 2021, the Behavioral Health Services substance abuse counselor provided assessment, referral, and treatment to 101 adults and teens struggling with substance use disorders.

In addition to individual outpatient counseling, group programs were also provided utilizing the evidence-based curriculum called PRIME for Life. Research conducted on these programs demonstrated effectiveness in helping participants reduce or eliminate high-risk substance use. The chart below shows the number of individuals who received substance abuse assessment and outpatient treatment services each year.

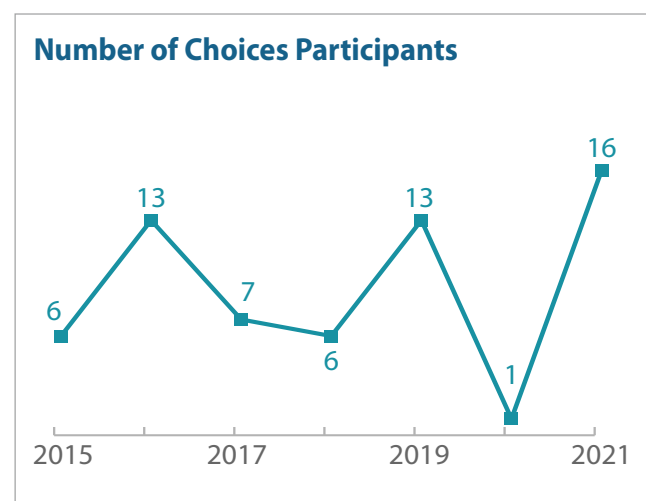

RICHLAND COUNTY HHS INTOXICATED DRIVERS PROGRAM

Alcohol and other drug abuse is a significant health and public safety problem. Each year in Wisconsin, there are over 800 documented deaths, 10,000 traffic crashes, resulting in 8,000 injuries, and over 90,000 arrests, all attributable to alcohol and other drugs. Impaired drivers present a danger to themselves and the community. In addition to fines and criminal penalties, when an individual is convicted of operating a motor vehicle while intoxicated, state law mandates that he or she be ordered to complete an Intoxicated Drivers Program (IDP) Assessment. The IDP assessor conducts a specific type of assessment for this program and, based on the results, the offender is referred to the appropriate education or treatment program.

RICHLAND COUNTY HHS CHOICES PROGRAM

Choices is an educational program that is offered as an alternative sentence by the court to violators of the underage drinking laws of Wisconsin. Underage offenders may face a fine, loss of driver's license, and, as a result of the conviction, increased insurance rates. The Choices option allows a first offender the opportunity to keep his or her driver's license and avoid a conviction record. The program uses the evidence-based PRIME for Life curriculum which has been shown to improve low risk decision making among participants. While Choices courses continued to be offered virtually during 2021, 16 clients were served in the program.

RICHLAND COUNTY KEY STAKEHOLDER INTERVIEWS OCTOBER 2022

Sector	Number of Interviews Conducted
School	3
Non-profit	3
Health Care	2
Business	2
Media	1
Government	1
Total Participants	11

QUESTION: WHAT ARE THE TOP HEALTH PRIORITIES IN RICHLAND COUNTY?

What Are The Top Health Problems in Richland County?

Mental Health	9
Substance Abuse	8
Obesity/ Sedentary Lifestyle	7
Poor Nutrition	4
Access to Health Care	4
Women's Health	1

Comments Related to Top Health Priorities:

- Physical health starts with mental health
- Mental health - there is a long wait list for mental health services
- It's 4:00 PM time for a drink, that's the norm
- Students are vaping in the classroom
- COVID-19 and social media has led to increased anxiety and bullying

QUESTION: WHAT ARE THE TOP HEALTH PRIORITIES IN RICHLAND COUNTY?

Why Do These Problems Exist?

Social Media/Technology	9
Attitudes Toward Underage Alcohol Use	5
People are Inactive	5
Lack of Education	6
Lack of Providers	6
Unhealthy Food Culture	7
Lack of Resources	8
Impact of COVID-19	8

Within the broad category of mental health, participants identified the following:

- Anxiety was mentioned six times; bullying was mentioned three times
- The impact of COVID-19 on mental health was mentioned four times

Within the broad category of substance use, participants identified the following:

- Underage drinking was mentioned five times; vaping was mentioned four times
- Adult binge drinking and Richland's permissive drinking culture was mentioned three times

Comments Related to Why These Problems Exist:

- Poor nutrition is tied to behaviors in students.
- Food from government programs is unhealthy. Students get food, but it's not healthy food.
- Resources are limited but often people do not know how to access existing services.
- People in Richland County work hard throughout their lives. As they get older, and as they retire, they become less active and do not engage in health activities.
- Resources are limited but often people do not know how to access existing services.
- As a community we do not have discussions about community health with a focus on prevention.
- Vending machines have poor nutritional standards, even at the hospital and other places.

QUESTION: WHAT AREAS OF THE COUNTY OR PEOPLE/GROUPS IN THE COUNTY ARE NOT BEING SERVED?

Rural	3
Families in Poverty	10
Immigrants/Non-English	4
Elderly	3
Homeless	2
Disabled Persons	2
Farmers	2
Families/Families with Behavioral Issues	1

Comments Related to Who in Richland County is Underserved:

- We have great activities - but athletics get expensive and families with multiple children and families in poverty cannot participate.
- Farmers are often underserved.
- Kids are often translating for their parents.
- A lot of students miss well-child checks. we have seen an increase in the number of students participating in hearing screening and immunization programs. *This comment was made in the context of families in poverty are underinsured or uninsured or are unsure how to access services and, as a result, children are often missing their well-child checks — so there is a growing number of students who are getting services offered at school.*
- Free and reduced lunch has doubled in the last couple of years.
- A lot of people living in poverty have a sense of hopelessness.

QUESTION: WHAT IS RICHLAND COUNTY DOING WELL?

Partners for Prevention

Public Health Nurses

Parks and Recreation

Swimming Programs

Farmers Market

Tourism Board

Programs Outside of School

Outdoor Theater

Kyaking & Biking Trails

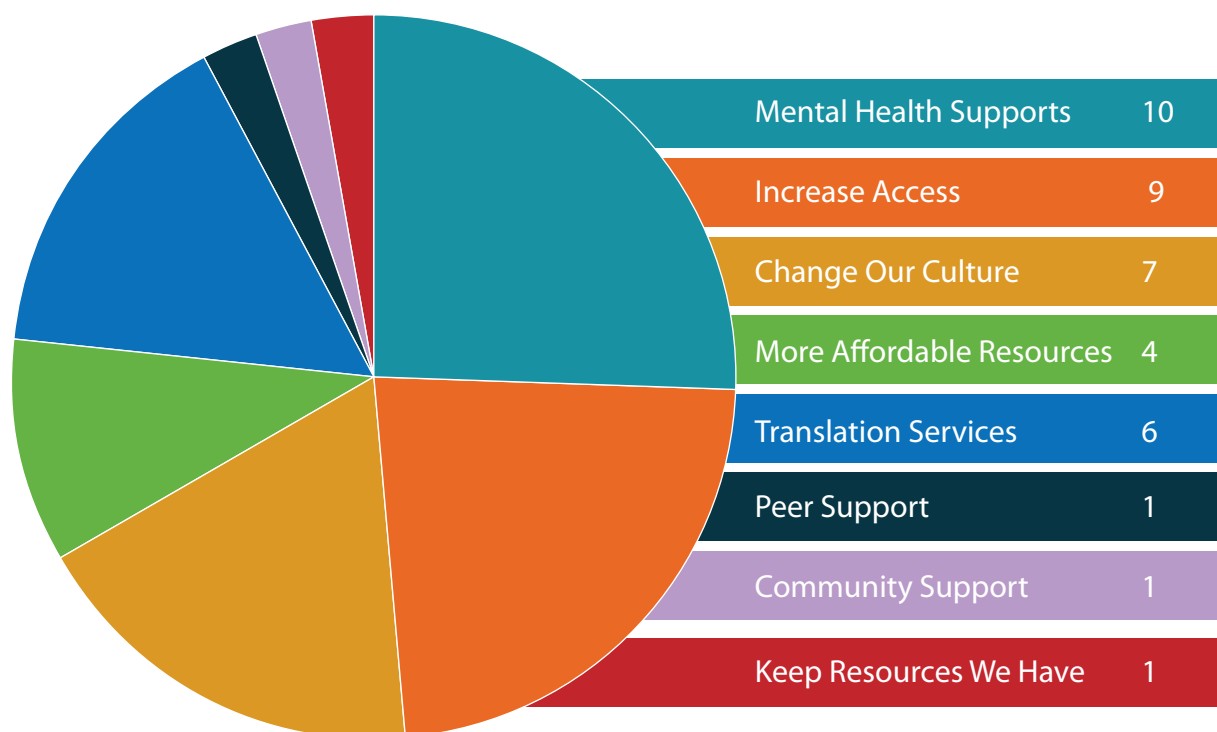

Sources of Strength

Regenerative Agricultural Practices

Comments Related to What Richland County is Doing Well:

- We need a change in mentality. Partners for Prevention is working to change that.
- St Mary's has started a program to get healthy foods into schools — this program could be expanded.
- The outdoor theatre was great during COVID-19.
- There are great programs for seniors.
- The tourism board does a great job both within and outside of Richland County.
- We have a fantastic swim program.
- There are lots of opportunities for youth to get involved in activities in Richland County.
- We have great public health nurses who are doing an amazing job! We need more nurses, though.
- We are doing a lot well.
- The farmer's market is great.

QUESTION: WHAT STRATEGIES ARE NEEDED?

Comments Related to What Should be Done:

- There are peer support programs outside of Richland County.
- We need more mental health services.
- We need to increase access to health care (women's health; mental health services; medical care). *This comment was made by nine participants.*
- We need more translation services.
- We need more programs outside of school for youth, which will allow different groups of children to mix, and this may help reduce the amount of bullying.
- We need to change the culture. *This comment was made three times and relates to the permissive alcohol culture that contributes to underage drinking as well as adult binge drinking.*

2022 RICHLAND COUNTY DATA WALK

On Monday, November 7, 2022, the 2022 Health Assessment and Wellness Commission (HAWC) hosted a community data walk event led by Impact Community Planning Group. The data walk was held at the White House Conference Center in Richland Center. Key stakeholders were personally invited and the general public was urged to participate via advertisement on the radio, HAWC social media accounts, and websites. (Appendix M)

At the event, more than 40 attendees (Appendix N) were divided amongst eight conference tables. Each table had a table host recruited and trained by HAWC. Primary data from the CHNA survey as well as secondary data sourced from CensusReporter.org and Richland County Health and Human Services was posted on walls around the room. Over the course of 3.5 hours, attendees enjoyed a healthy meal and reviewed the primary and secondary data to determine top community health needs. When considering all data sources, attendees determined the top two health concerns for Richland County were: mental health and substance abuse.

MENTAL HEALTH CONCERNS LISTED AT THE DATA WALK WERE:

Anxiety • Depression • Social Connection • Mental Health Access • Suicide • Isolation
Bullying • Mental Health Provider Ratio • Sense of Belonging • Number of Poor Mental Health Days
Mental Health Conditions of Students • Increased Mental Health Distress
Tech/Screen/ Social Media • Peer Pressure • Number of Uninsured
Awareness of Resources and Education on What You Can Do • COVID-19 Effects
The Need for Breaking Down “Silos” • Reactive VS Proactive

SUBSTANCE ABUSE CONCERNS LISTED AT THE DATA WALK WERE:

Opioid Use • Illegal Drug Use • Drug Crimes Increasing • Drug Possession • Binge Drinking
Youth Substance Use • Increase in Vaping • Preventative Work
Alcohol Related ER Visits/ Hospitalizations • Drug Overdose Deaths • Addiction
Underage Drinking • Reactive VS Proactive

CONCLUSION

In Richland County, the process of comprehensively assessing the community's health needs was again led by a diverse group of community stakeholders from the sectors of healthcare, public health, Extension, and education. This Health Assessment and Wellness Commission (HAWC) was established in 2016 and came together again in 2022 to revisit priorities established in the 2019 CHNA and to look for changes in community needs. This 2022 report includes their review of multiple sources of secondary data, whereby the broad trends in community health were assessed for the region. Additionally, they created an online survey in both English and Spanish to seek input from the general community. To gain in-depth knowledge from community leaders and residents, one-on-one key stakeholder interviews were conducted and, additionally, a data walk event was held for all interested community members to attend. Priorities identified were mental health and substance abuse – these are needs that will be the focus of all HAWC members. In addition, The Richland Hospital and Clinics will add the third greatest concern of the community: obesity. These priorities are continued from both our 2016 and 2019 CHNA processes.

- Review of multiple sources of secondary data revealed that these priorities continue to be concerns for Richland County. County Health Rankings & Roadmaps 2022 (Appendix G3) indicated the continued prevalence of adult obesity (36% of population; up from 33% in 2019) and adult excessive drinking (24% of population – consistent with 2019). Richland County Health and Human Services data showed an annual increase in the number of crisis services they provided for mental health over the past several years. Wisconsin Department of Justice noted the number of drug arrests for possession or sale of illegal substances continued to increase annually.
- Results of the online survey indicated that top health concerns of respondents include the cost of health care (86%) concern over illegal drug use (66%) and obesity (68%), and that a majority (71%+) believe their access to mental health care is poor or fair.
- Participants in the focus groups shared multiple suggestions about new strategies that could be implemented in each area to continue to improve outcomes. This shows sustained community interest and willingness to work on the priorities of Mental Health Treatment, Substance Abuse Prevention & Treatment, and Obesity Prevention & Treatment.

With those priorities having been first identified in the 2016 CHNA, multiple organizations made Community Health Improvement Plans (CHIPs) to improve outcomes in those areas. Reflecting on community progress showed a decrease in diversity of programs and community responses since 2019 – mostly attributable to the COVID-19 pandemic. All parties are encouraged by the positive impact of vaccinations in Richland County and are able to refocus energies on addressing different facets of the concern to improve outcomes.

The conclusion of the HAWC is that continuing to support community coalitions in their work on Mental Health Treatment, Substance Abuse Prevention & Treatment, and Obesity Prevention & Treatment is the best way to make progress in Richland County. With these needs reaffirmed by the 2022 CHNA assessment process, the HAWC members feel that continuing to support coalitions as they implement grassroots and evidence-based responses, while providing shared metrics for success, is how Richland County will see continued progress in these areas.

We're on a mission to improve community health. We need your help.

Every three years we conduct the Community Health Needs Assessment (CHNA). Part of our process includes the distribution of a public survey. By completing this CHNA survey, you provide vital information that helps us identify our communities' most significant needs. From there, we carefully develop appropriate strategies and programs and refine or add services.

- The CHNA survey provides vital information that impacts the services we and our partner organizations offer.
- **It is anonymous and takes about 5 minutes to complete.**
- There are no risks to you for participating and no penalties for not participating.
- You will be asked questions about health/wellness status, needs, concerns, and challenges.
- Data will be publicly available to help people and organizations improve community services.
- **Deadline to participate is Friday, October 21, at 5 p.m.**
- Find and take our survey online at RichlandHospital.com.

Thank you for being a proactive part of our goal to meet our communities' health needs.

Online Survey

APPENDIX K-2

Tenemos la misión de mejorar la salud de la comunidad. Necesitamos tu ayuda.

Cada tres años llevamos a cabo la Evaluación de las Necesidades de Salud de la Comunidad (CHNA). Parte de nuestro proceso incluye la distribución de una encuesta pública. Al completar esta encuesta de CHNA, proporciona información vital que nos ayuda a identificar las necesidades más importantes de nuestras comunidades. A partir de ahí, desarrollamos cuidadosamente estrategias y programas apropiados y refinamos o agregamos servicios.

- La encuesta de CHNA proporciona información vital que afecta los servicios que ofrecemos nosotros y nuestras organizaciones asociadas.
- **Es anónimo y tarda unos 5 minutos en completarse.**
- No hay riesgos para usted por participar ni sanciones por no participar.
- Se le harán preguntas sobre el estado de salud/bienestar, necesidades, inquietudes y desafíos.
- Los datos estarán disponibles públicamente para ayudar a las personas y organizaciones a mejorar los servicios comunitarios.
- **La fecha límite para participar es el viernes 21 de octubre a las 5 p.m.**
- Encuentre y responda nuestra encuesta en línea en RichlandHospital.com.

Gracias por ser una parte proactiva de nuestra meta para satisfacer las necesidades de salud de nuestras comunidades.

2022 Community Health Needs Assessment Survey

This survey ensures that we are doing all we can to listen and understand how our communities' health resources can be improved. By completing this survey, you will provide vital information that helps us identify our communities' most significant needs. From there, we can carefully develop strategies, refine or add services, and promote programs that are all focused on the needs discovered through this survey.

- **The survey is anonymous; no data will be connected to you. There are no risks to you for participating and no penalty for not participating.**
- **The survey data will be publicly available to help people and organizations improve community services.**
- **You will be asked questions about health/wellness status, needs, concerns, and challenges.**
- **The survey should take between 5 and 10 minutes.**
- **The deadline to submit this survey is Friday, October 21, at 5 p.m.**

We thank you for being a proactive part of our goal to meet our communities' health needs.

* 1. What county do you live in?

- ☐ Richland County
- ☐ Crawford County
- ☐ Grant County
- ☐ Sauk County
- ☐ Iowa County
- ☐ Other (please specify)

* 2. In what ZIP code is your home located? (enter 5 digit ZIP code; for example, 53581 or 53556).

APPENDIX L-1 *continued*

* 3. What is your age?

- ☐ Under 18
- ☐ 18-24
- ☐ 25-34
- ☐ 35-44
- ☐ 45-54
- ☐ 55-64
- ☐ 65+

4. What is your current gender identity?

- ☐ Female
- ☐ Male
- ☐ Transgender Female
- ☐ Transgender Male
- ☐ Gender Variant / Non-Conforming
- ☐ Prefer not to answer
- ☐ Not listed (please specify)

5. Including yourself, how many people live in your household?

6. Thinking of the following aspects of health, how would you rate each?

	Poor	Fair	Good	Excellent
Your overall health	☐	☐	☐	☐
Your overall mental health	☐	☐	☐	☐
Your overall dental health	☐	☐	☐	☐
Your access to health care	☐	☐	☐	☐
Your access to mental health care	☐	☐	☐	☐
Your access to dental care	☐	☐	☐	☐
Your access to healthy food choices	☐	☐	☐	☐

APPENDIX L-1 *continued*

7. Please select the top five health challenges you face.

- ☐ Cancer
- ☐ Diabetes
- ☐ Overweight / obesity
- ☐ Lung disease
- ☐ High blood pressure
- ☐ Joint or back pain
- ☐ Alcohol overuse
- ☐ Drug addiction
- ☐ Domestic violence (physical/psychological abuse)
- ☐ Financial
- ☐ High cholesterol
- ☐ Family member alcohol / drug addiction
- ☐ Dental
- ☐ Cigarette smoking
- ☐ Aging
- ☐ Chronic pain
- ☐ Lyme / tick-borne disease
- ☐ Long-COVID
- ☐ Heart disease / stroke
- ☐ Mental health (anxiety, depression, etc.)
- ☐ Autoimmune disorder
- ☐ Vaping
- ☐ Hunger / food security
- ☐ Other (please specify)

- ☐ I do not have any health challenges.

APPENDIX L-1 *continued*

8. What types of health screenings or services are needed to keep you and your family healthy? (Check up to 5)

- ☐ Blood pressure
- ☐ Cancer
- ☐ Cholesterol
- ☐ Dental
- ☐ Disease outbreak prevention
- ☐ Drug and alcohol abuse
- ☐ Eating disorder
- ☐ Emergency preparedness
- ☐ Exercise / physical activity
- ☐ Falls prevention for the elderly
- ☐ Heart disease
- ☐ HIV / AIDS and STDs
- ☐ Routine wellness checkups
- ☐ Memory loss
- ☐ Mental health / depression
- ☐ Nutrition
- ☐ Prenatal care
- ☐ Quitting smoking
- ☐ Suicide prevention
- ☐ Vaccination / immunizations
- ☐ Weight-loss help
- ☐ Other (please specify)

APPENDIX L-1 *continued*

9. Where do you get most of your health and wellness information?

- ☐ Doctor / health care provider
- ☐ Facebook or Twitter
- ☐ Family or friends
- ☐ Health department
- ☐ Hospital
- ☐ Internet
- ☐ Library
- ☐ Newspapers / magazines
- ☐ Radio
- ☐ School or college
- ☐ TV
- ☐ Worksite

10. Please choose all the statements that apply to you.

- ☐ I exercise at least three times per week.
- ☐ I eat at least five servings of fruits or vegetables each day.
- ☐ I smoke cigarettes, cigars, a pipe, or vape.
- ☐ I chew tobacco.
- ☐ I use illegal drugs.
- ☐ I abuse or overuse prescription drugs.
- ☐ I have more than four alcoholic drinks (if female) or five (if male) per day.
- ☐ I have access to a wellness program through my employer.
- ☐ None of the above apply to me.

APPENDIX L-1 *continued*

11. How concerned are you about the following issues in your community?

	No Concern	A Little Concerned	Concerned	Very Concerned
Alcohol use	☐	☐	☐	☐
Hunger / food security	☐	☐	☐	☐
Illegal drug use	☐	☐	☐	☐
Obesity	☐	☐	☐	☐
Prescription drug misuse	☐	☐	☐	☐
Suicide	☐	☐	☐	☐
Tobacco use	☐	☐	☐	☐
Sexual abuse or violence	☐	☐	☐	☐
Domestic abuse or violence	☐	☐	☐	☐
STDs	☐	☐	☐	☐
COVID-19	☐	☐	☐	☐
Mental health services	☐	☐	☐	☐
Quality of education (higher education, tech school, etc.)	☐	☐	☐	☐
Healthy food access	☐	☐	☐	☐
Cost of health care	☐	☐	☐	☐
Gun safety	☐	☐	☐	☐
Access to sidewalks/safe exercise	☐	☐	☐	☐
Housing (availability and affordability)	☐	☐	☐	☐
Childcare options	☐	☐	☐	☐
Entertainment other than electronic	☐	☐	☐	☐
Other infectious diseases	☐	☐	☐	☐
Vaping	☐	☐	☐	☐
Homelessness	☐	☐	☐	☐

Another issue I am very concerned about is:

APPENDIX L-1 *continued*

12. Please rate progress (since 2019) regarding community health needs.

Poor	Fair	Good	Excellent
☐	☐	☐	☐

Encuesta de Evaluación de Necesidades de Salud Comunitaria 2022

Esta encuesta garantiza que estamos haciendo todo lo posible para escuchar y comprender cómo se pueden mejorar los recursos sanitarios de nuestras comunidades. Al completar esta encuesta, usted proporcionará información vital que nos ayuda a identificar las necesidades más significativas de nuestras comunidades. A partir de ahí, podemos desarrollar cuidadosamente estrategias, perfeccionar o añadir servicios y promover programas centrados en las necesidades descubiertas a través de esta encuesta

- La encuesta es anónima; ningún dato se relacionará con usted. No hay riesgos para usted por participar y no hay penalización por no participar
- Los datos de la encuesta estarán disponibles públicamente para ayudar a las personas y organizaciones a mejorar los servicios comunitarios
- Se le harán preguntas sobre el estado de salud y bienestar, las necesidades, las preocupaciones y los retos.
- La encuesta debe durar entre 5 y 10 minutos.
- La fecha límite para enviar esta encuesta es el viernes 21 de octubre a las 17:00 horas

Le agradecemos que sea una parte proactiva de nuestro objetivo de satisfacer las necesidades de salud de nuestras comunidades.

*1. ¿En qué condado vives?

- ☐ Condado de Richland
- ☐ Condado de Crawford
- ☐ Condado de Grant
- ☐ Condado de Sauk
- ☐ Condado de Iowa

7. Seleccione los cinco principales desafíos de salud que enfrenta.

- ☐ Abuso de alcohol
- ☐ Cancer
- ☐ Colesterol alto
- ☐ Dental
- ☐ Desorden autoinmune
- ☐ Diabetes
- ☐ Dolor cronico
- ☐ Dolor de espalda o articulaciones
- ☐ Drogadiccion
- ☐ Enfermedad cardíaca/accidente cerebrovascular
- ☐ Enfermedad de Lyme/transmitida por garrapatas
- ☐ Enfermedad pulmonar
- ☐ Envejecimiento
- ☐ Familia con adicción al alcohol/drogas
- ☐ Financiero
- ☐ Fumar cigarrillos
- ☐ Hambre / seguridad alimentaria
- ☐ Hipertensión arterial
- ☐ Largo-COVID
- ☐ Salud mental (ansiedad, depresion, etc.)
- ☐ Sobrepeso / obesidad
- ☐ Vapear
- ☐ Violencia domestica (abuso fisico/psicologico)
- ☐ Otro (por favor especifique)

☐ No tengo ningún problema de salud.

APPENDIX L-2 *continued*

THE RICHLAND HOSPITAL
and Clinics

8. ¿Qué tipos de exámenes de salud o servicios se necesitan para mantenerlo a usted y a su familia saludables? (Marque hasta 5)

- ☐ Abuso de drogas y alcohol
- ☐ Ayuda para bajar de peso
- ☐ Cancer
- ☐ Chequeos rutinarios de bienestar
- ☐ Colesterol
- ☐ Cuidado prenatal
- ☐ Dejar de fumar
- ☐ Dental
- ☐ Desorden alimenticio
- ☐ Ejercicio / actividad fisica
- ☐ Enfermedad del corazon
- ☐ HIV/AIDS y enfermedades de transmisión sexual
- ☐ Nutricion
- ☐ Perdida de memoria
- ☐ Preparacion para emergencias
- ☐ Presion arterial
- ☐ Prevencion de caidas para personas mayores
- ☐ Prevención de brotes de enfermedades
- ☐ Prevenion del suicidio
- ☐ Salud mental / depresion
- ☐ Vacunacion / inmunizaciones
- ☐ Otro (por favor especifique)

APPENDIX L-2 *continued*
